PROFESSIONAL SUMMARY

Results-driven Solar Permit Quality Engineer with 3.5+ years of specialized experience in PV permit design, AHJ compliance verification, and cross-functional team leadership. Proven track record of delivering 500+ compliant permit plan sets while maintaining 98%+ quality standards. Skilled in training technical teams, developing quality assurance processes, and coordinating with stakeholders to ensure on-time project delivery. Proficient in AutoCAD and PV design workflows, with a strong commitment to continuous learning and advancing into senior permitting, compliance, and team leadership roles within the renewable energy sector.

CORE COMPETENCIES

Solar Permit Design & Engineering • AHJ Compliance & Code Review • Quality Assurance/Quality Control (QA/QC) • PV Plan Set Development • CAD Design (AutoCAD) • Team Leadership & Training • Process Optimization • Electrical & Structural Design • Project Coordination • Regulatory Documentation • Client Relations • Technical Problem-Solving

PROFESSIONAL EXPERIENCE

One Place Solar — Noida, Uttar Pradesh, India

Senior PV Permit Quality Engineer | September 2026 – Present

- Lead quality assurance operations for 200+ residential and commercial solar permit designs monthly, ensuring 98%+ compliance with diverse AHJ regulations across 15+ US jurisdictions
- Conduct comprehensive technical reviews of PV plan sets, electrical diagrams, structural attachments, and site layouts to verify accuracy and adherence to NEC, IBC, and local building codes
- Manage task allocation and provide technical guidance to a team of 5 permit designers, reducing design errors by 40% and improving average review turnaround time from 48 to 24 hours
- Collaborate with cross-functional teams including sales, project management, and installation crews to resolve technical queries and ensure seamless project execution
- Develop and implement QA/QC checklists and standard operating procedures that improved first-submission approval rates by 35%
- Serve as primary point of contact for resolving complex permit design challenges and AHJ-specific requirements, contributing to 95%+ client satisfaction scores

One Place Solar — Noida, Uttar Pradesh, India

PV Permit Quality Engineer | September 2023 – September 2024

- Designed and delivered 300+ compliant residential solar permit plan sets for US markets using AutoCAD, ensuring alignment with client specifications and local AHJ requirements
- Interpreted technical site assessment data, utility requirements, and structural engineering reports to create accurate electrical one-line diagrams, site layouts, and racking details
- Verified input documents for accuracy and completeness, coordinating with sales teams to clarify project requirements and prevent downstream delays
- Maintained 92% on-time delivery rate while consistently meeting quality benchmarks, directly supporting revenue growth and customer retention

- Contributed to the development of internal design templates and quality standards that accelerated project workflows by 25%

One Place Solar — Noida, Uttar Pradesh, India

Intern – PV Permit Engineer | September 2022 – September 2023

- Developed foundational expertise in solar permit engineering, including PV layout design, electrical system diagrams, and structural attachment specifications
- Completed 100+ permit design projects under senior engineer supervision, achieving 90%+ accuracy on technical deliverables
- Gained proficiency in CAD software and learned to interpret AHJ-specific codes, building department requirements, and utility interconnection standards
- Recognized for strong attention to detail, proactive problem-solving, and rapid skill acquisition in technical solar design workflows

LEADERSHIP & TRAINING EXPERIENCE

Team Lead & Training Coordinator – One Place Solar (Agra Branch)

- Designed and delivered comprehensive on-boarding and training program for 8-member Agra branch team, accelerating new hire proficiency from 6 weeks to 3 weeks
- Created structured training modules covering PV design fundamentals, AHJ compliance best practices, quality control procedures, and CAD workflow optimization
- Provided ongoing mentorship and technical support, reducing permit design errors by 50% and improving team output quality to match corporate standards
- Coordinated daily task assignments and workflow prioritization to ensure project deadlines were consistently met across distributed team structure
- Established feedback loops and performance tracking systems that improved team accountability and skill development

EDUCATION

Diploma in Civil Engineering | Pusa Institute of Technology | May 2020 – May 2022

Relevant coursework: Structural Design, Construction Management, CAD & Technical Drawing

CERTIFICATIONS & TRAINING

- NCC Cadet – A Certificate (Leadership & Discipline Training)
- Public Works Department (PWD) Industrial Training Certificate

TECHNICAL SKILLS & TOOLS

CAD & Design Software: AutoCAD (Advanced), Revit, SketchUp, PVsyst (Familiar)

Industry Knowledge: NEC Compliance, IBC Standards, AHJ Requirements, Permit Submittal Processes, Utility Interconnection

Additional Tools: Microsoft Office Suite, Google Workspace, Project Management Software, Video Editing

Languages: English (Professional Proficiency), Hindi (Native)

PROFESSIONAL ATTRIBUTES

Growth-oriented solar professional with team leadership experience training. Committed to continuous learning through industry certifications and emerging technology adoption. Seeking opportunities in renewable energy sector.
